VINTAGE CONDITIONS

The 2017 vintage was full of challenges: ever changing and cool weather conditions delayed ripening dates on all varieties. This resulted in a longer hang-time for fruit, which ensured the flavour and aroma concentrations were exceptional. Above average winter rainfall left the dams full and soil moisture levels were stable to ensure the best conditions for quality fruit and consistent moderate / cool weather conditions maintained optimum vine balance and excellent colour, flavours and aromas in the grapes.

WINEMAKING

Picked in the cool morning and rushed straight to be pressed. Cool fermentation in stainless steel tanks coupled with the specific clone provides crisp fruit with a fresh steely backbone.
